

CHETAN PATTAN

Software Engineer | .NET Developer

Mumbai, India | 9969193562 / 8850653487 | chetanpattan01@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in .NET development, specializing in ASP.NET Core Web API, ASP.NET MVC, and enterprise banking applications. Proven track record building and integrating Loan Origination Systems (LOS) and Loan Management Systems (LMS) with extensive third-party API integrations. Skilled in designing secure, scalable applications using JWT authentication, RSA encryption, automated schedulers, and webhook services. Experienced in delivering high-performance solutions within banking and financial domains using Microsoft technologies, with hands-on exposure to production support, database administration, and enterprise deployment.

TECHNICAL SKILLS

Languages & Backend: C#, ASP.NET, ASP.NET MVC, ASP.NET Core MVC, ASP.NET Web Forms, Web API, Laravel

Frontend: HTML5, CSS3, JavaScript, Bootstrap, jQuery, AJAX

Database: MS SQL Server, MySQL, Stored Procedures, Functions, DB Backup & Restore, Compatibility-Level Upgrades

Frameworks & ORM: Entity Framework, ADO.NET

Security: JWT Authentication, RSA Encryption, Token-Based Authorization, IP Whitelisting

Tools & Platforms: Git, IIS (Administration & Upgrades), Visual Studio, VS Code, Postman, SSMS

PROFESSIONAL EXPERIENCE

Software Engineer – .NET Developer — Krtiva Technologies Pvt. Ltd.

May 2024 – Present

Client: SBI Factors Private Limited — Subsidiary of State Bank of India

- Develop and integrate enterprise-level Loan Origination System (LOS) and Loan Management System (LMS) applications for banking solutions.
- Integrate third-party APIs including Karza, Accumn, CRIF, Cygnet, Doqfy, YONO Banking, and SBI Payment APIs for KYC, credit, and payment workflows.
- Develop secure .NET 6/9 Web APIs using JWT authentication, RSA encryption, and token-based authorization mechanisms.
- Automate recurring operational tasks using .NET 9 schedulers, significantly reducing manual intervention.
- Build and maintain secure webhook services for real-time data exchange with third-party platforms including M1xchange, InvoiceMart, and RXIL.
- Coordinate directly with third-party vendors to manage Change Requests (CRs), oversee development deliverables, and issue technical sign-offs for production deployments.
- Collaborate with infrastructure and networking teams to configure secure API communication via IP whitelisting, restricting API/webhook access to trusted IPs across UAT and Production.
- Perform SQL Server database backup, restore, and compatibility-level upgrades using SSMS for LOS/LMS production and UAT environments.
- Carry out IIS and application server upgrades, configuration, and maintenance for enterprise banking deployments.

Junior Software Developer — Digital Edge Technologies Pvt. Ltd.

Oct 2023 – Mar 2024

- Developed and maintained E-commerce and ERP applications using ASP.NET MVC and ASP.NET Web Forms.
- Built backend business logic, APIs, and database operations using C#, ADO.NET, and MS SQL Server; implemented frontend functionality using HTML, CSS, JavaScript, Bootstrap, jQuery, and AJAX.
- Collaborated directly with clients to gather requirements and deliver technical solutions, improving application performance through optimized coding practices.

ASP.NET Developer Intern — IGS Recruiting Solution

Jan 2023 – Jun 2023

- Developed frontend and backend modules using ASP.NET technologies, collaborating with cross-functional teams on requirement gathering and project documentation.
- Gained hands-on exposure to the real-world software development lifecycle and deployment workflows.

CERTIFICATIONS

- ISO 9001 and ISO 27001 Essentials — Great Learning (Sep 2026) — Credential ID: MTXPYQQJ — Covers Quality Management Systems (QMS) & Information Security Management Systems (ISMS).

EDUCATION

Master of Science in Computer Science — Ramnarain Ruia Autonomous College, Mumbai | 2021 – 2023

Bachelor of Science in Computer Science — Ramniranjan Jhunjhunwala College, Mumbai | 2018 – 2021
